

ACORN STAMPING

Acorn Stamping, Inc. is a privately held Michigan manufacturer established in 1958. We are a highly skilled team with years of engineering and tooling experience. Our goal is to always surpass your expectations. With over 190 fixtures and ballasts, and over 450 lamps, our lighting costs for energy and maintenance exceeded \$10,000 per year.

Recently DG Energy thoroughly assessed our current lighting situation and used its extensive expertise to develop a new lighting plan using appropriate LED products as well as provide several different funding solutions. They were then able to execute the conversion in a very professional manner, with minimal disruption to the operations of the shop, workforce and the administrative offices. We are very happy with the final lighting result as well as the economic benefits now being realized.

DG Energy handled our entire program from start to finish: from the design, installation, rebates as well as showing us all of our alternatives to acquire this technology.

Upon completion of the project we are able to give them our highest endorsement. Please do not hesitate to contact me at (248) 628-5216 or gstjohn@acornstamping.com, if I can be of any assistance regarding this endorsement.

Regards,

Greg St. John

Chief Executive Officer
